

Factory Documentation

To provide factory production staff with clear and accurate user-defined shop floor documentation regarding the tasks to be performed and the materials required.

The Value of SYSPRO Factory Documentation

- Produce material requisitions for components
- Provide visibility of expected start and completion dates for each operation within a job
- Set the expected duration of each operation
- Produce production staff with routing instructions
- Provide visibility of materials issued and operations completed, including quality control
- Inform the production staff of the next operation to be performed (for routing)
- Prepare job packs

Matching SYSPRO to Your Business

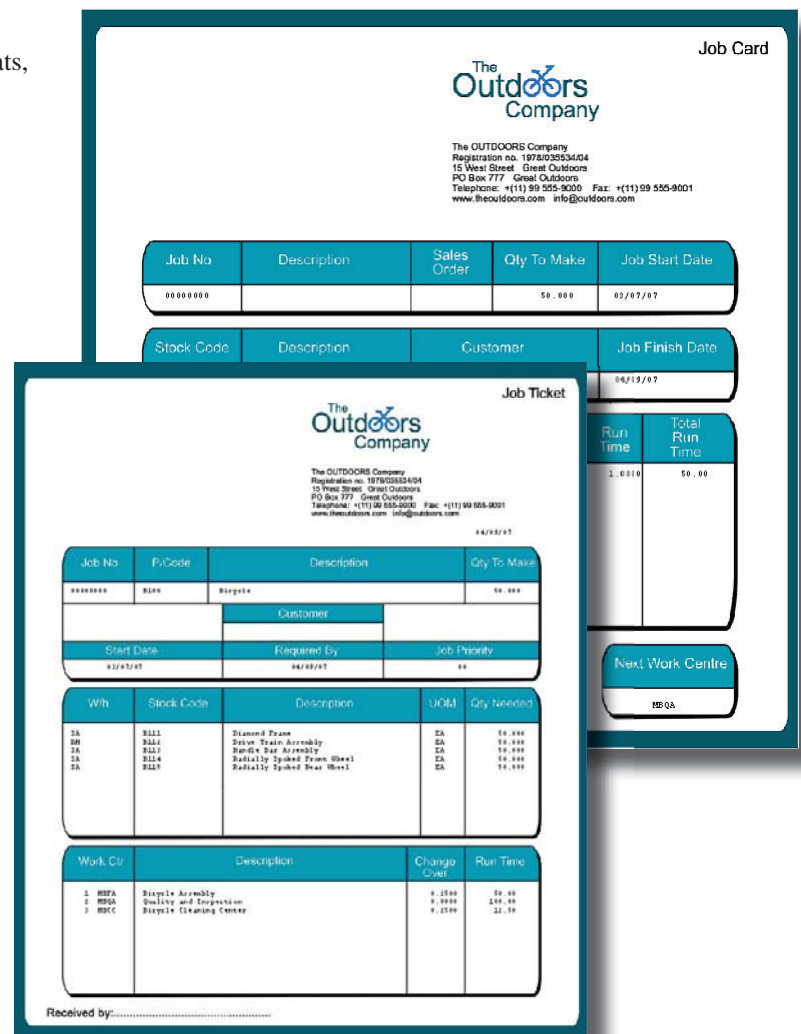

- Define up to 36 different Factory Documentation formats, such as:
 - Job Tickets
 - Material Requisitions
 - Route Cards
 - Travelers
- Print bar codes on documents for use with automated data collection devices
- Include operation instructions, technical notes and material notes on documentation
- Print material requisitions per operation or work center
- Generate documentation for a range of existing jobs or for selected jobs
- Produce documentation for dummy jobs for a specified quantity based on a standard Bill of Material
- Reprint factory documentation as required
- Include stock code and job multimedia on documentation

Audit Trails and Reporting

- Status flags are maintained to indicate whether documents have been printed for each job
- Reprint documents if required

Integration

- Integrates with the Work in Progress, Bill of Materials, and Inventory Control modules
- Factory Documentation requires the Bill of Material module
